I am a Computer Engineer. I have 6 years of experience in frontend web development. I have created web applications, websites and landing pages, among other solutions for users. I have worked remotely in several companies participating in multidisciplinary teams. I have added value with my skills and ability to adapt to different scenarios, projects and technologies. My specialty is React.js, but I also handle other frameworks such as Vue.js and Angular. I am passionate about creating beautiful, interactive and functional interfaces.

Professional Experience

Frontend Developer   07/2025 – 10/2025 │ Remote, Venezuela
Freelance
Migrated a legacy Angular app with technical debt for a food store and order management system. Involves team development of new app in Angular 20 with Clean Architecture, including:
- UI redesign and UX improvements.
- Modular interface development.
- Integration with existing REST API.

Frontend Mobile Developer   04/2025 – 05/2025 │ Remote, Chile
Freelance
- I developed interfaces for a mobile application using React Native, meticulously following the UX/UI design in Figma and consuming a REST API to ensure the proper rendering of data in the application.

Frontend Developer   12/2023 – 12/2024 │ Remote, Panamá
Nolatech
- I participated in the development of an ongoing web chat platform made in React.js adding new features.
- I led the frontend development of a maritime shipping tracking and administrative web application using Next.js and connecting a GraphQL API.
- I collaborated in the design and development of a bug tracking application (Next.js).

Frontend Developer   12/2022 – 03/2023 │ Remote, EEUU
Portl
- Implemented UI/UX improvements in a web platform for content creators in production, developed with Next.js.
- I increased the scope of the application by developing new features and interfaces.
- I optimized the project's code by fixing bugs and performing refactoring.

Frontend Developer   02/2021 – 01/2022 │ Remote, Colombia
Smartbunny
- I participated in the expansion of an ongoing web project creating new interfaces with React.js.
- I contributed in the development of the web version of a social network with Next.js, making the UI and integrating serverless connections.
- I collaborated in the construction of an administrative system in Angular developing the UI and integrating a REST API.
- I developed landing pages and websites using HTML, CSS and Bootstrap.

Junior Developer   01/2019 – 01/2021 │ On site, Venezuela
LCC Opentech
I cooperated in the development of a web application with React.js for industrial process control performing the following tasks:
- I built the UI following designs.
- I integrated a REST API to consume and manage data.
- I connected data in real time.

Education

Computer Engineering   2015 – 2023 │ Puerto Ordaz, Venezuela
Universidad Nacional Experimental de Guayana

Skills

HTML │ CSS │ JavaScript │ TypeScript │ React.js │ Next.js │ Angular │ Vue.js │ Astro │ React Native │ Bootstrap │ Tailwind CSS │ Material UI │ Redux │ React Router │ React Hook Form │ React Testing Library │ Git │ REST API │ GraphQL │ Apollo Client │ Scrum
